Hi all,

Many thanks to Jessica for the files below! Look forward to the discussion today. If you can, please access this webinar link:

Subject: RE: RE: Request for spreadsheet(s) of HEAST and PPRTV values

Hi Kate,

The following/attached is for today's talk (and I just re-attached everything so it's all in one place, and did make one minor change in the units of the Data requests master table).

Some links for examples of the types of data the contractor might find (in case this comes up):

Cal EPA: Search Butylated Hydroxyanisole at <http://www.oehha.ca.gov/risk/chemicalDB/index.asp>
IRIS: <http://www.epa.gov/iris/subst/0354.htm>
PPRTV: <http://hhpprtv.ornl.gov/quickview/pprtv.php?chemical=Anthraquinone%2C+9%2C10-> or
<http://hhpprtv.ornl.gov/quickview/pprtv.php?chemical=Butyl+benzyl+phthalate>
HEAST: <http://epa-heast.ornl.gov/heast.php?chemical=Bis%282-chloro-1-methylethyl%29+ether>

Also attached are some slides. I'm thinking we'll start with the Data requests_master table and Data Request Template and go over the issues with that (and use the links above as needed), then move into the timeline/milestones in the powerpoint.

Please let me know if you have any questions or comments, otherwise talk to you at 1:30!

Jessica

Subject: RE: RE: Request for spreadsheet(s) of HEAST and PPRTV values

One more bullet for discussion:

For these values (excerpted from data request matrix):

PPRTV (P)

Value only (24)

PPRTV appendix (X)

Value only

(6)

HEAST (H)

Value only (20)

Environmental Criteria and Assessment Office (E)

Value only (18)

RSL User Guide(S)

Value

only (7)

New Jersey (J)

Value only (1)

Are there too few chemicals to model: no reason to collect additional information???

Or can we aggregate these with IRIS???

Data Request
Template.xls
